

Mozaïk™ is a game-changing haemostatic device designed to significantly reduce post-dialysis compression time, a critical step in stopping bleeding that can take more than 10 minutes on average, or even more than 25 minutes for patients receiving high doses of anticoagulants.

By addressing this key issue for both caregivers and patients, Mozaïk™ offers the following advantages:

- Transparent design**  
Visual monitoring of clotting process
- Thick foam frame**  
Facilitates installation and prevents side leaks
- Mechanical action**  
without haemostatic active substance

## COMPRESSION TIME COMPARISON RESULTS FROM VARIOUS SCIENTIFIC STUDIES

\*EVAMOZ study, directed by ECHO association, 2024

\*\*Evaluation de nos pratiques professionnelles : apport des pansements hémostatiques dans l'hémostase de la fistule artério-veineuse ? – Lila GHOUTI-TERKI

## TIME SAVING

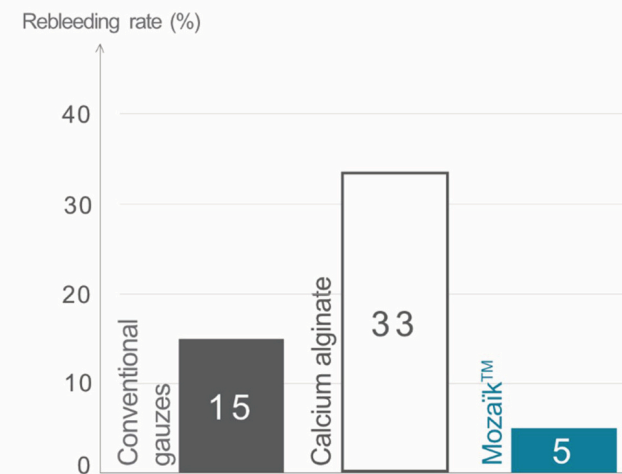

Mozaïk™ reduces compression times by an average of more than **6 min per treatment**.

Time saving:

Per week : **18** minutes  
Per year : **15** hours

Based on 3 dialysis per week

## BLEEDING RATE COMPARISON\*

\*Guerraoui A (2017) Prospective Study: evaluation of arterio venous fistula (AVF) compression with new device Mozaïk™ in two French hemodialysis facilities. Submitted abstract Société Française de néphrologie (NICE City France).

## PATIENT SATISFACTION SURVEY\* USING MOZAÏK™

## CAREGIVER SATISFACTION SURVEY\* USING MOZAÏK™

\*EVAMOZ study, directed by ECHO association, 2024

## CONCLUSION

Mozaïk™ offers a remarkable **54 %** reduction in compression time compared to standard protocols, saving valuable time for caregivers and enhancing patient comfort. With a significant decrease in rebleeding episodes to just **5 %** of cases, Mozaïk™ ensures a safer dialysis process.

Transform your haemostasis process with our sterile, single-use Mozaïk™ device. Equipped with a patented microperforated adhesive film, Mozaïk™ acts on blood rheology to fast-track platelet plug formation and cut compression time down to an average of just 5.8 minutes\*, delivering unrivaled efficiency backed by scientific proof.

With Mozaïk™, safety and transparency go hand in hand. Our protective film shields against blood exposure accidents while allowing you to keep a close eye on the coagulation process. The thick foam edges make Mozaïk™ setup a breeze, guarantee a perfect seal, and streamline needle removal – ideal for self-dialysis or home dialysis.

Designed for compatibility with all Arterio-Venous Fistula (AVF) types, Mozaïk™ is committed to improving patients' quality of life. Our biocompatible adhesive is free from chemical agents, ensuring complete respect for patients' skin and health.

Opt for Mozaïk™, the innovative and efficient solution for rapid, safe, and comfortable haemostasis in dialysis.
